SKILLS

SECURITY

JWT / OAuth2 · 2FA · TOTP · HashiCorp Vault · KYC & Compliance · Blockchain Verification · Linux Hardening · Networking

LANGUAGES

JavaScript · TypeScript · Java · C · C++ · SQL · Solidity

BACKEND

Spring Boot · Node.js · REST API · WebSocket

FRONTEND

React · Redux · Vue.js · Tailwind · Vite

DEVOPS

Docker · Git · Linux · Nginx · PostgreSQL

BLOCKCHAIN

Web3.js · Web3j · Foundry · wagmi/viem

LANGUAGES

Portuguese (native) 100%
French (advanced) 80%
English (B1 – Intermediate) 55%

PROFESSIONAL PROFILE

Systems Analysis & Development graduate (42 Luxembourg – École de Code, 13/03/2026), actively building cybersecurity depth through three parallel tracks: a Cybersecurity Specialization at 42 Luxembourg, an online Cybersecurity degree at Unigran Europa (Belgium), and DLH Academy's Cybersecurity path — Common Core completed, now in the **Defensive Specialization** (expected December 2026). I build secure, compliant software end-to-end — authentication (JWT, 2FA/TOTP), secrets management (HashiCorp Vault), KYC/compliance architecture, and blockchain-based integrity verification. Comfortable across the stack (Java/Spring Boot, React/TypeScript, Linux, Docker/Kubernetes), I am now focused on moving that foundation into Security Operations: threat monitoring, incident detection and response, and continuous hardening of production systems.

PROFESSIONAL EXPERIENCE

Full Stack & Blockchain Developer
July 2025 – Present
Zaori Capital — Digital Finance Platform

- Development of an asset-tokenization platform (Real World Assets – RWA) in a regulated fintech environment
- Designed compliance architecture and KYC verification workflows
- Built secure RESTful APIs (Java/Spring Boot) for the platform backend
- Developed smart contracts and Web3 integrations, with attention to blockchain security considerations
- React/TypeScript interfaces for digital asset management

EDUCATION

Cybersecurity Defensive Specialization
Expected completion: Dec 2026
DLH Academy — dlh.lu

- Intensive cybersecurity training path — Cybersecurity Common Core completed, currently in the Defensive Specialization track

Cybersecurity Specialization
2026 – Ongoing
42 Luxembourg — École de Code

Cybersecurity (Online Degree)
Since early 2025 – Ongoing
Unigran Europa — Brussels, Belgium

Systems Analysis and Development
2024 – 2026 · Graduated 13/03/2026
42 Luxembourg — École de Code

- Intensive peer-to-peer training with hands-on, project-based learning; Unix, networking, data structures and programming paradigms
- Final project: ft_transcendence — task marketplace with ERC-20 token (ZION), real-time chat, Ethereum blockchain, JWT auth and 2FA

NOTABLE PROJECTS

ft_transcendence
42 Luxembourg — Final Project · 2025–2026

- Backend: Java 21 + Spring Boot, JWT authentication, 2FA (TOTP), HashiCorp Vault for secrets management, WebSocket STOMP, Web3
- Task marketplace with ERC-20 token economy (ZION) and Ethereum blockchain integration (Sepolia)

Zaori Capital
Asset Tokenization Platform (RWA) · zaoricapital.com

- Compliance-first architecture: KYC verification workflows for a regulated real-world-asset (RWA) tokenization platform
- Stack: Java 21 + Spring Boot (REST APIs) · React 19 + TypeScript · Web3 smart contract integration · PostgreSQL

BR Solutions
Corporate Website · brsolutions.lu

- Multi-page site with contact API (nodemailer), i18next internationalization and light/dark theme
